Summary

As a motivated graduated Computer Science student at Gdansk University of Technology, I'm eager to apply my diverse technical skills to real-world projects. I am energetic, inventive, and quick to learn. With a proficiency in various technologies and a knack for designing solutions and debugging issues, I'm ready to contribute meaningfully to your team.

What sets me apart is my journey of personal growth and adaptability. Leaving my home country at 18 to pursue education abroad has shaped me into an independent and agile learner, proficient in languages and technologies. My passion for coding, algorithms, and problem-solving, coupled with a keen interest in emerging technologies, drives my determination to excel in this field.

I'm seeking a job or practical experience to further hone my skills and make a positive impact on your projects.

Hard skills

- **Programming languages and frameworks:**
 - Java (Core, Spring, Jakarta EE)
 - Bash/shell
 - C/C++ (Basic understanding)
 - Python scripting
- **Version Control & CI/CD:**
 - GIT
 - GitHub, GitLab
 - CI/CD pipelines
- **Software Architecture & Design:**
 - Backend applications architecture
 - Algorithms and Data Structures
 - Computer Architecture
 - Memory management
- **Backend Development:**
 - RESTful APIs Development
 - Relational Databases (PostgreSQL, MySQL)
 - Non-relational Databases (MongoDB, Redis)
 - Asynchronous Processing
 - Scripting & Process Automation
- **Operating Systems & Infrastructure:**
 - Linux and Bash
 - Docker, Kubernetes (basic knowledge)
 - Automation & Deployment (Jenkins basic knowledge)
 - Streaming & Message Queueing
- **Automation & Scripting:**
 - Automating System Processes
 - Web Scraping
 - Infrastructure Automation (Terraform, Ansible – basic knowledge)
- **Testing:**
 - Unit & Integration Testing
 - JUnit, Mockito
 - API Testing (Postman)
- **General:**
 - OOP
 - Development techniques and Debugging
 - Problem solving and analytical skills
 - Software Development Life Cycle

Certificates

- JS/FE PRE-SCHOOL 2022Q4 (JAVASCRIPT)
<https://app.rs.school/certificate/t396qdp1>

Soft skills

Communication:

- Effective **communication** and **collaboration**
- **English** communication
- Writing **clear emails**, **documentation**, and **reports**

Problem-Solving & Critical Thinking:

- **Breaking down complex** problems into **smaller steps**
- **Troubleshooting** and **debugging efficiently**
- Thinking **creatively** to **find solutions**

Learning Agility & Growth Mindset:

- Being **open to feedback** and **applying it**
- Staying **curious** and **learning new technologies**
- Quickly **adapting** to **new challenges**

Proactiveness & Initiative:

- **Self-learning** and **improving skills** independently
- Seeking **feedback** and **acting on it**

Education

Masters of engineering in Computer Science

Gdansk University of Technology 02.2025 - 07.2026

Bachelors of engineering in Computer Science

Gdansk University of Technology 10.2021 - 02.2025

Languages

English	Polish	Russian
Upper-intermediate	Fluent	Fluent

Some of my projects

Microservices-based web application using the Spring framework

• https://github.com/Kistus/Microservice_architecture Java Spring JWT token Authentication App using Spring

https://github.com/Kistus/Spring-auth_JwtToken-app

Developed skills:

- Java
- Spring framework
- Docker
- Microservices-based architecture
